

Verve® Mini Switch

Self-powered wireless controls put comfort and convenience in the palm of your hand.

The Verve® Mini Switch is a battery-free handheld remote that provides convenient wireless control of lighting, temperature and miscellaneous electric loads from any location within range in or outside of a home or building. The mini switch is self-powered and will never require batteries because the simple act of pressing the rocker generates enough kinetic energy to send a signal to other Verve devices. The mini switch features dual rocker switches and is small enough to fit in the palm of your hand, keep in your pocket or leave in your car to turn lights on as you pull up to a house or building. This wireless handheld remote offers a level of convenience you cannot achieve with traditional switches.

Features & Benefits

- Communicates wirelessly with other Verve devices using EnOcean radio frequency technology.
- Convenient handheld remote for easy portability.
- Self-powered - no batteries to replace and no on-going maintenance.
- Capable of performing switching and dimming functions.

Verve® Mini Switch
